A Murata Company

# 60S24.107BCH-A 3,000 Watt

60V/24V Bi-Directional DC/DC Converter

## **Product Overview**

The 3,000-Watt 60S24.107BCH-A bi-directional, non-isolated DC/DC converter provides a complete solution for in-vehicle power distribution with 24V/60V battery configurations for a variety of applications including micro and mild hybrid e-Mobility systems.

The bi-directional DC/DC converter charges a low side (24V) battery during normal operation (Buck mode) and charges or assists the high voltage (60V) battery in emergency situations (Boost mode). The bi-directional DC/DC converter operates more as an ideal current source with variable direction, thus allowing energy transfer between two voltage domains.

Voltage feedback maintains the output voltage within the acceptable operating range and eventually allows a custom charging profile for the battery pack. The converter regulates the average current flowing between the high voltage and low voltage ports in the direction selected via CAN interface. It is packaged in IP6K9K rated housing. Three M8 bushings are provided for power connection, an 8-pin connector for ENABLE, and baud rate selection signals and CAN communication.

#### **Features**

- E-Mobility 24V/60V Battery System
- Buck and Boost modes of operation
- Low-Side Voltage Range (LS): 16V-32V (Code C)
- High-Side Voltage Range (HS):36V-63.2V (Code F)
- Overcurrent, Overvoltage, & Over-Temperature Protection (all protections are latching)
- Disconnect switch LS (24V) and HS (60V)
- Constant Voltage and Constant Current Mode
- LS and HS Current Programming and Monitoring
- Internal temperature monitoring
- High power density
- Efficiency up to 96.5%
- Dimensions 10.4" x 9.9" x 2.05"
- Weight 7.58 lb. (3.44 kg)
- Constant switching frequency
- CAN 2.0b Interface including ENABLE
- Good shock and vibration damping
- RoHS Compliant

## **Operational Characteristics**

| Parameter               | Min.             | Тур.              | Max.              | Units        |
|-------------------------|------------------|-------------------|-------------------|--------------|
| Operating Temperature   | -40              | -                 | 85                | °C           |
| Storage Temperature     | -55              | -                 | 125               |              |
| High Side               |                  |                   |                   |              |
| Parameter               | Min.             | Тур.              | Max.              | Units        |
| Operating Voltage Range | 36               | 48                | 63.2              | v            |
| Turn-on Threshold       | 35               | 35                | 53                |              |
| Turn-off Threshold      | 34               | 34                | 52                |              |
| Input Current Range     | 1                | -                 | 85                | А            |
| Over-Voltage Protection | 35               | 65                | 66                | V            |
| Low Side                |                  |                   |                   |              |
| Parameter               | Min.             | Тур.              | Max.              | Units        |
| Operating Voltage Range | 18               | 24                | 32                |              |

Calex Manufacturing, Inc. ("Calex") makes no representation that the use of its products in the circuits described herein, or the use of other technical information contained herein, will not infringe upon existing or future patent rights. The descriptions contained herein do not imply the granting of licenses to make, use, or sell equipment constructed in accordance therewith. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards that anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm, and take appropriate remedial actions. Buyer will fully indemnify Calex, its affiliated companies, and its representatives against any damages arising out of the use of any Calex products in safety-critical applications. Specifications are subject to change without notice.
